Gopal Kholade

Data & Machine Learning Analyst | Python, PySpark, Scikit-Learn, SQL | Building Scalable ML Workflows & Data Pipelines
Pune District, Maharashtra, India

Summary

Data Analyst with strong experience in data transformation, pipeline automation, and exploratory data analysis, transitioning applied skills into Machine Learning and Applied AI. Proficient in Python, SQL, PySpark, and BI visualization to convert complex multi-source datasets into clean, actionable data products. Hands-on experience building automated data ingestion workflows, predictive modeling pipelines, and exploring GenAI architectures (PEFT, RAG, and local LLM deployment). Focused on engineering scalable, end-to-end data and machine learning solutions that automate operational processes and drive data-informed decisions.

Experience

On Direct Marketing Services
Data Research Analyst
December 2024 - Present (1 year 11 months)
Pune District, Maharashtra, India

- Data Cleaning & Pipeline Automation: Engineered and maintained automated data extraction, cleaning, and validation pipelines using Python and SQL, reducing manual processing overhead and ensuring high data integrity across enterprise datasets.
- Exploratory Data Analysis & Analytics: Conducted in-depth exploratory data analysis (EDA) and performance tracking; created interactive Tableau and BI dashboards to visualize key operational KPIs and metrics.
- Feature Engineering & Preprocessing: Applied statistical normalization, outlier treatment, and data wrangling techniques to prepare structured raw inputs for analytical modeling and downstream reporting.
- Cross-Functional Collaboration: Partnered with stakeholders to translate business requirements into technical data schemas, actionable metric dashboards, and automated reporting systems.

Education

Sant Gadge Baba Amravati University, Amravati

Bachelor of Engineering - BE, Information Technology · (August 2018 - May 2022)
